TRADING TODAY FOR A GREENER TOMORROW

CORPORATE PRESENTATION | August 2023

F INVEST is a licensed electricity trader, specialized in the purchase and sale of green energy.

F INVEST develops its activities in the following directions:

- Forecasting, balancing and purchasing electricity from renewable energy sources (RES) producers, managing the participation of RES producers on the organized energy exchange and delivering electricity for their own needs.
- Long-term contracts for the purchase and sale of electricity from RES.
- Wholesale trade of electricity, delivery to large industrial customers, import and export of electricity.
- Expert and consulting activity in the renewable energy sector.

Our commitment to a sustainable future, positions us as a platform for a path to the market and trade of electricity produced from renewable sources.

We have brought together producers and consumers of renewable electricity in a dynamic market. From large-scale producers to small businesses and individual consumers, we ensure the transition to green electricity.

We believe that a green future is not just the production of electrical energy from renewable sources, but also a guarantee that green electricity reaches those who need it, when they need it, at a fair price.

Therefore, the heart of our platform is a secure, efficient and transparent trading mechanism that serves producers and consumers of electricity of all scales.

COORDINATOR OF A STANDARD BALANCING GROUP

F INVEST, as a coordinator of a standard balancing group, brings together a great number of renewable energy producers with various renewable electricity technologies, which are geographically diversified. The professionalism of the team, along with the structure of the composition of the balancing group, are essential prerequisites for optimizing the costs of balancing and the net revenues of the RES producers.

STANDARD BALANCING GROUP

Gainers	Price	Total installed Power
AFC	172.55	+3
BPRT	29.51	+1
GOM	42.03	+2
AITA	23.16	+2
UTAS	37.24	+2

500 MW

450 MW PVPP

40 MW WPP

10 MW HPP

The standard balancing group consists of electricity producers from renewable energy sources with installed capacity of and above 0.500 MW. We have built trust in our balancing group members, which are large local and foreign investors in renewable energy.

F INVEST protects the interests of its clients, ensures compliance with the legal requirements of the regulatory framework for balancing, sale of produced electricity, and compliance with the conditions for paying a premium from the Electricity System Security Fund.

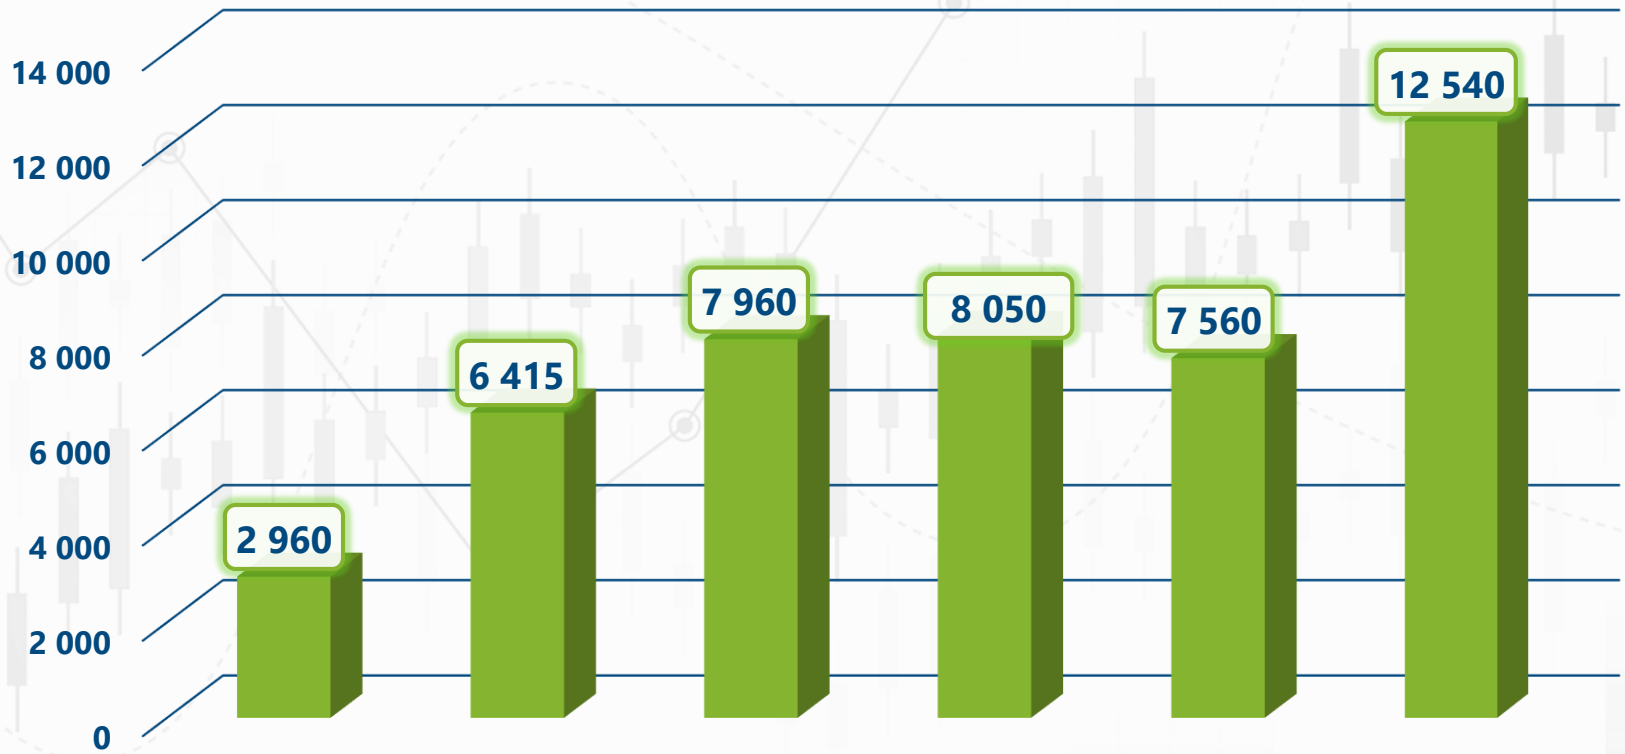

Our team of professionals, with years of experience and expertise, solves the commercial challenges facing renewable electricity producers. It is ready to assist in achieving the lowest balancing costs and guarantees the highest revenue, security, and predictability from the sale of green electricity.

Achieving security, predictability, and the highest return from the sale of green electricity is at the basis of everything we do. Along with this, we introduce our clients to market analyses, regulatory updates, and trend forecasts.

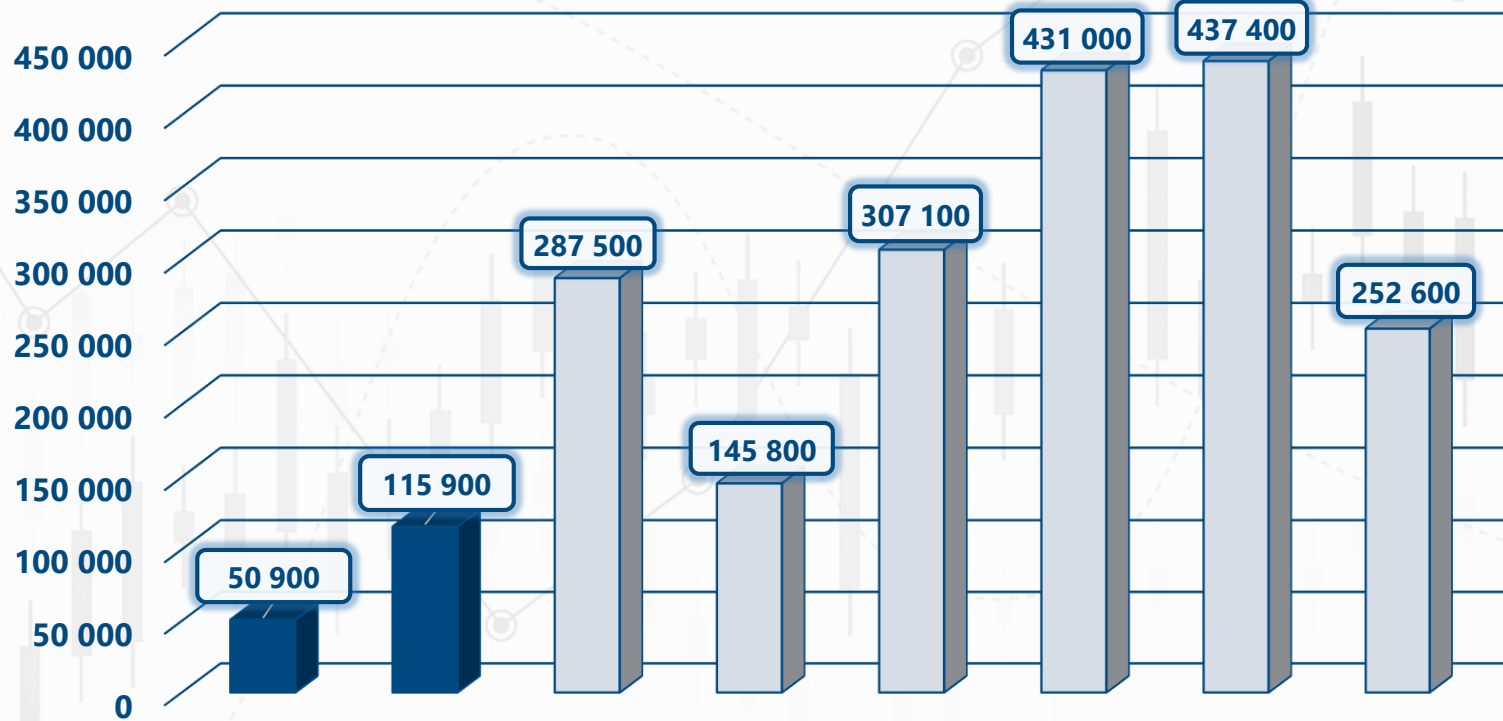

We strive to be a comprehensive resource for everything related to renewable electricity.
